

**The National Library
Bibliographic Classification (BBK)
as a Base for Subject Search in the
Integrated RSL Digital Library.
The Project presentation.**

Lavrenova Olga
the Russian State Library
Moscow

**The integrated RSL Digital Library
contains about 805 000 titles,
including the Dissertation Digital
Library (690 000 full texts).**

A high quality of subject search is accessible only provided that a system can take into account semantic relationships between search characteristics (hierarchy, synonymy, association).

The project purpose is the ensuring of these conditions on the base of the existing use-proven classification means.

**Full version of the Library
Bibliographic Classification BBK:**

**about 120000 classification
numbers,**

**Classification Scheme code *rubbk*
in MARC 21**

Some libraries install in their OPACs various machine-readable classification schemes in their initial forms.

But it is not very easy for users to construct a search characteristic if a classification structure is complicated.

**Many modern users
like to get an outcome
quickly and “on
default”.**

2 variants of technologies to use semantic relationships by information retrieval in the RSL:

- ✦ **inclusion interpretations (hierarchical strings of captions) of BBK classification numbers in every bibliographic record**
- ✦ **installation in open access an «operational» classification variant related with OPAC as a knowledge model.**

Bibliographic record includes:

- ▲ BBK classification numbers**
- ▲ hierarchical strings of
captions for numbers**
- ▲ free (uncontrolled) key words
in addition**

The «operational» classification will include:

- ▶ all complex classification numbers from all bibliographic records generated during a cataloguing process
- ▶ caption hierarchy for every complex classification number
- ▶ the relevant amount of bibliographic records in the RSL OPAC for every classification number (caption) indicated by search.

The request:
**“The Volga language group
of Finno-Ugrian languages”**

Class. Number SH 166.32-211 |2 rubbk

Title The Derivation of Negative in the Mari language

BBK caption hierarchy

**Philological sciences. Belles-lettres --
Linguistics – Languages of the world --
Finno-Ugric languages -- Volga languages
group -- Mari languages (Mari,
Cheremis) -- Grammar -- Morphology --
Word-formation**

E-address

<http://dlib.rsl.ru/rsl01002000000/rsl01002732000/rsl01002732180/rsl01002732180.pdf>

The classification number structure (9 levels):

SH Philological sciences. Belles-lettres

+ SH1 Linguistics

++ SH16 Languages of the world

+++ SH166 Finno-Ugrian languages

++++ SH166.3 Volga languages group

+++++ SH166.32 Mari languages (Mari, Cheremis)

++++++ SH166.32-2 Grammar

+++++++ SH166.32-21 Morphology

+++++++ SH166.32-211 Word-formation

**The aim consists in
“decoding” of classification
numbers in all remaining
records for books = they
should get caption
hierarchies.**

**Classification numbers + their captions in the form
of catalogue guide cards** 
for data editing by software and experts.

SHCH	Art. Study of Art
+SHCH 3	Separate music varieties and musical performance
++ SHCH 31	Music
+++ SHCH 315	Instrumental music
+++ +SHCH 315.3/9	Music instruments. Study of instruments
+++++ SHCH 315.31	Ancient instruments
+++++ +SHCH 315.32	Folk instruments
+++++ +SHCH 315.4	Keyboard instruments
+++++ +SHCH 315.41	Clavichord. Clavecin. Spinnet
+++++ +SHCH 315.42	Piano

BBK classification numbers and there caption hierarchies (caption strings) for

- bibliographic records,**
- «operational» classification
related with OPAC**

SHCH 315.3/9 Art. Study of Art -- Music -- Separate music varieties and musical performance -- Instrumental music -- Music instruments. Study of instruments

And so on ...

SHCH 315.4 Art. Study of Art -- Music -- Separate music varieties and musical performance -- Instrumental music -- Music instruments. Study of instruments -- Keyboard instruments

SHCH 315.41 Art. Study of Art -- Music -- Separate music varieties and musical performance -- Instrumental music -- Music instruments. Study of instruments -- Keyboard instruments – Clavichord. Clavecin. Spinnet

SHCH 315.42 Art. Study of Art -- Music -- Separate music varieties and musical performance -- Instrumental music -- Music instruments. Study of instruments -- Keyboard instruments – Piano

3 new levels from the OPAC for that example:

**SHCH 315.42 Art. Study of Art -- Music -
- Separate music varieties and musical
performance -- Instrumental music --
Music instruments. Study of instruments --
Keyboard instruments – Piano --
Piano music history -- -- 19th
century -- Themes and images**

Hierarchical strings of captions from the RSL OPAC.

(semasiology) |2rubbk

653|a preposition

The embedding of that classification numbers with caption strings into **database of the «operational» classification system** is a task for the next year.

It is very impotent to allocate the data base **in the open access** for processing by well-known Internet systems.

**the «operational» classification system
in the open access**

**the direct hierarchical search
and search on free word combinations**

**the relevant amount of bibliographic records
for every classification number by search**

the information retrieval in the OPAC, the DL

**A check-out of the technology
“decoding classification
numbers”**

At the input - *E693.32-73*9.1,0
from a bibliographic record.

E693.32-73 The system take out the string
for this part:

Life sciences-- Zoology -- Animals taxonomy. –
Chordata. Chordates – Vertebrata. Vertebrates.
Vertebrates zoology
-- Pisces. Fish. Ichthyology –
Physiology, biophysics and biochemistry –
Physiology

Examples of full “decoded” numbers:

R410.150.11 (Pericarditis)

SH5(2=P)75-65я44 (Poetry, collection)

E693.363.99 (Dolphins)

V192.18,09 (Mathematics. Iteration method)

Thank you!
