NKOS Special Issue in IJDL

- International Journal on Digital Libraries has invited the workshop proposers to organize a NKOS special issue in IJDL

- Guest editors:
  - Philipp Mayr
  - Douglas Tudhope
  - Xia Lin
  - Stella Dextre Clarke
  - Maria Lei Zeng

This special issue will solicit high quality papers that demonstrate exceptional achievements on NKOS, including but not limited to:

- Mapping between Linked Data vocabularies
- Meaningful Concept Display and Meaningful Visualization of KOS
- Applications of KOS systems in relation to 'Big data'
- KOS-based recommender systems for suggestion of meaningful concepts.
- KOS in e-Research metadata contexts - intersection between research data, KOS, Semantic web.
- Management and integration of multiple vocabulary types
- SKOS extensions
- Social tagging. What is the role of social tagging and informal knowledge structures versus established KOS?
- Users' interaction with KOS in the online environment.
- Quality issues in web-based KOS. Issues concerning large metadata sets. Version management.
- KOS and learning. What is required to use KOS effectively to convey meaning, to assist users to express their information needs to assist in sense making and learning?
- Multilingual and Interdisciplinary KOS applications and tools.
