

20th European Networked Knowledge Organization Systems (NKOS) Workshop

**A virtual workshop held as part of the JCDL 2022 Conference
in collaboration with ISKO Italy**

**Organisers: Claudio Gnoli, Koraljka Golub,
Philipp Mayr, Douglas Tudhope**

Welcome and Introduction

- NKOS overview
- Workshop programme
- Workshop structure and Zoom arrangements
- Workshop website <https://nkos-eu.github.io/2022/programme.html>
- Presentations will be made available on the workshop website afterwards – *presenters please email any revised version*

NKOS: Networked Knowledge Organization Systems/Services

Informal network for enabling knowledge organization systems (KOS), such as classification systems, thesauri, gazetteers, and ontologies, as networked interactive information services to support the description and retrieval of diverse information resources through the Internet

Various series of NKOS workshops

- JCDL Conferences in USA (and CENDI)
 - ECDL → TPDF Conferences in Europe
 - ASIST Conferences in USA
 - DCMI Conferences worldwide
 - Listserv hosted by OCLC
-
- First U.S. NKOS workshop at ACM Digital Libraries Conference in Philadelphia 1997.
 - First European NKOS workshop at ECDL (European Conference on Digital Libraries) in Lisbon 2000.
 - First NKOS workshop at DCMI International Conferences on Dublin Core and Metadata Applications in Seattle 2003.

Cultural Hospitality and Indigenous Knowledge in KOS

Cultural Hospitality

“In order to develop knowledge organization systems for globalized information access and retrieval, we need a theoretical framework for knowledge organization systems that will privilege the needs of different cultures, whether they are national, ethnic, domain or disciplinary cultures. The concept of "hospitality" has long been established as one of the desiderata for the notation of bibliographic classification systems. Hospitality is the ability of a notation to admit new concepts appropriately and to accommodate them in the correct relationships with other concepts. To develop a new theoretical framework for knowledge organization systems, it is helpful to expand the concept of hospitality by 1) including provisions for hospitality beyond notational issues and 2) broadening hospitality to include different cultures as well as new concepts. These extensions of hospitality provide us with a new concept, "cultural hospitality".

Cultural Hospitality and Indigenous Knowledge in KOS

Indigenous knowledge organization

“Doyle (2013), building on the seminal work of Torres Strait Islander scholar Martin Nakata (2007; 2008, 305), presents a theoretical framework she calls “Indigenous knowledge organization @ Cultural Interface.” It is “comprised of an Indigenous social ontology, a relational Indigenous ethics, and humanistic commitment to more equitable outcomes for Indigenous learners.” Doyle’s focus on naming, claiming, and (re)creating uncovers seven principles of design used by Indigenous designers of KOSs. These seven principles are: Indigenous authority, Indigenous diversity, wholism and interrelatedness, Indigenous continuity, Aboriginal user warrant, designer responsibility, and institutional responsibility.”
